REINERSCT^{III}

The highlights

- Browser-based
- Free time **Card** App for Android and iOS
- As many definable access logics as you like
- Door opener for remote opening
- Extensive ID card management including immediate cancellation of lost keys
- Extensive logging possibilities
- Documentation of all access attempts
- Extendible with the time *Card* 10 time recording

time *Card* 10 access control **Key-Features**

With the time **Card 10 access control** you can ensure, around the clock, that only authorised persons gain access to certain area or buildings. This effectively protects your property against unauthorised access. And if an electronic key gets lost, you can bar it with a single click in the system. time Card access control ensures maximum security in your company.

Easy handling

- Configurable by smart phone, tablet and PC
- Possibility of testing access logics
- Preview of allowed accesses per person or entrance
- ID card management for locking lost keys

Individual design of access logics

- Access logics according to the formula "who, when and where
- Person or department-specific configuration (who)
- Definition of authorisations (when)
- Definition entrances and entrance groups (where)
- Consideration of statutory holiday rules

time Card 10 App

Mobile time recording and access control mean maximum efficiency and flexibility. Because, with these, work times can be recorded and accesses monitored at anytime from anywhere.

Monitoring of all accesses

- Every access attempt is recorded
- Definition of alarm times
- Configuration of alarms
